

### Main measures

Coil type	A(mm)	B(mm)	C(mm)
RTC50	500	690	400
RTC60	600	690	400
RTC80	800	690	400
RTC100	1000	1025	700
RTC120	1200	1025	700

### RTC-coils for log conveyors

RTC-coils have been protected against the influence of metallic constructions around of the coil by a rigid aluminium body.

The sensitive coils have been located very close to the inner surface under a glass fibre sheet.

The polyurethane capsulation has hardened in a high pressure so that the mechanical disturbances from surroundings have a very small influence on the operation.

The construction on the coil and the TR-unit is min. IP65. Operating temperature range -40...+70C.
