FFCN-coils especially for panel industry
 FFCN-coils have been protected against the influence of metallic constructions both under and the sides of the coil by a rigid aluminium body. The sensitive coils have been located very close to the upper surface under a glass fibre sheet.
 The polyurethane capsulation has hardened in a high pressure so that the mechanical disturbances from surroundings have a very small influence on the operation.
 The construction on the coil and the TR-unit is minimum IP65.
 Operating temperature range -40...+70C.
